

CSAT Analytics

Customer Satisfaction & Call Center Performance

A three-page dashboard analyzing customer satisfaction, service levels, channels, sentiment and operational performance.

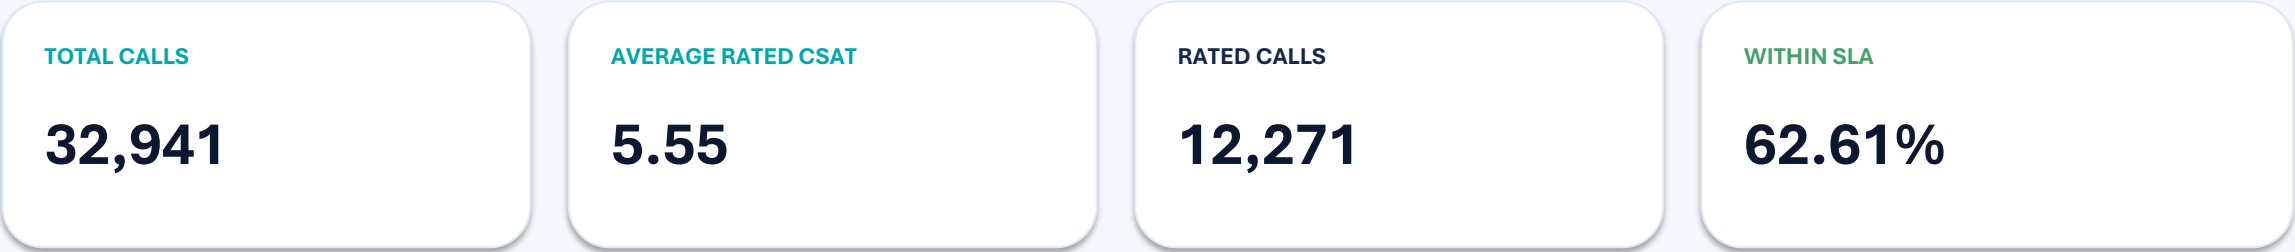

POWER BI

DASHBOARD

DATA ANALYTICS

Customer experience at a glance

Customer satisfaction metrics are presented alongside operational service performance.

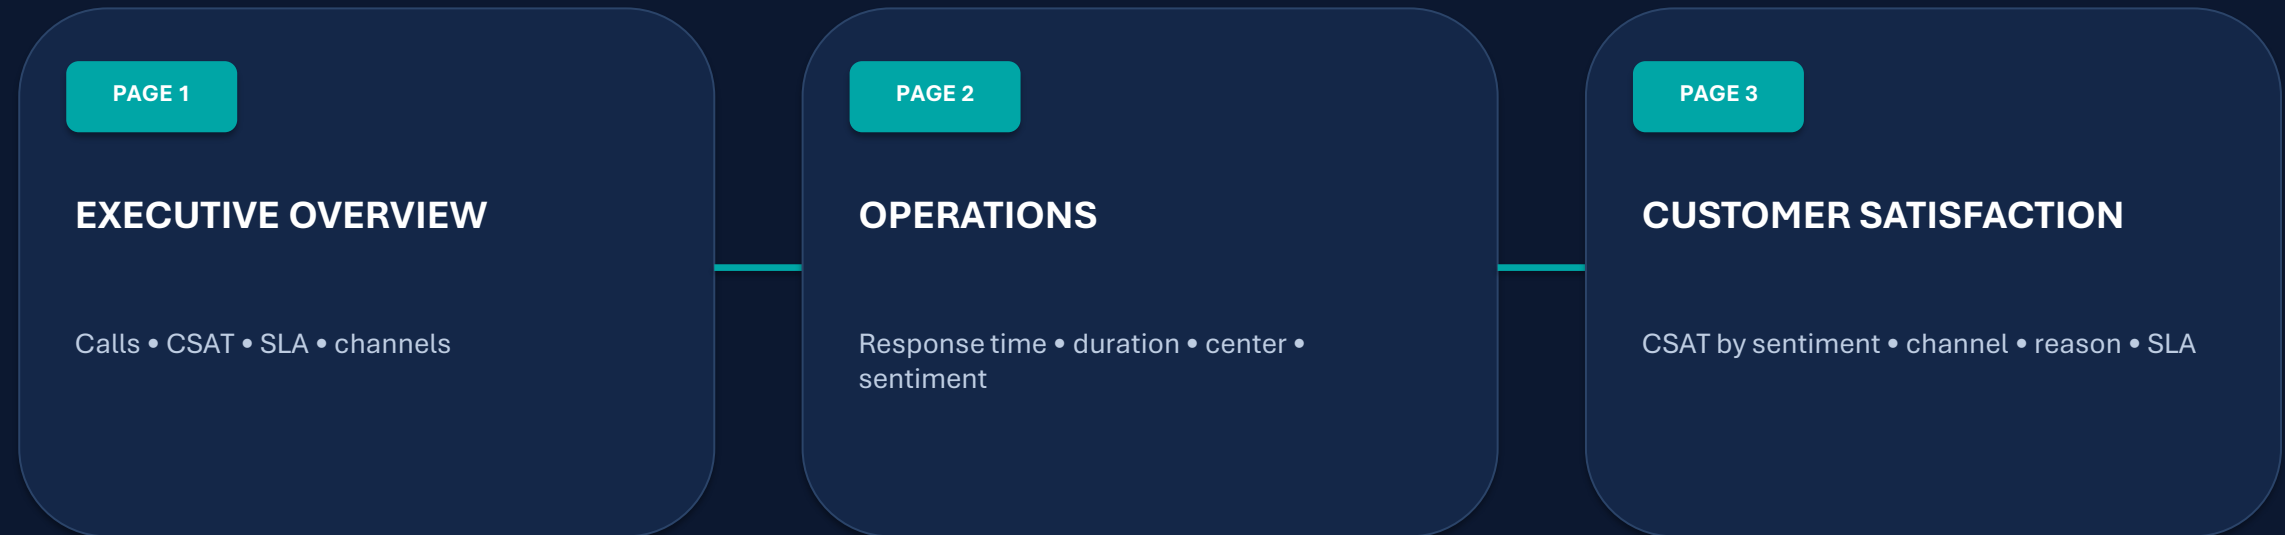

CORE STORY

Only 37.25% of calls received a CSAT rating, so satisfaction insights should be read together with rating coverage and operational measures.

Date range: October 1–31, 2020

Three pages, one analytical story

Executive overview → operations → customer satisfaction.

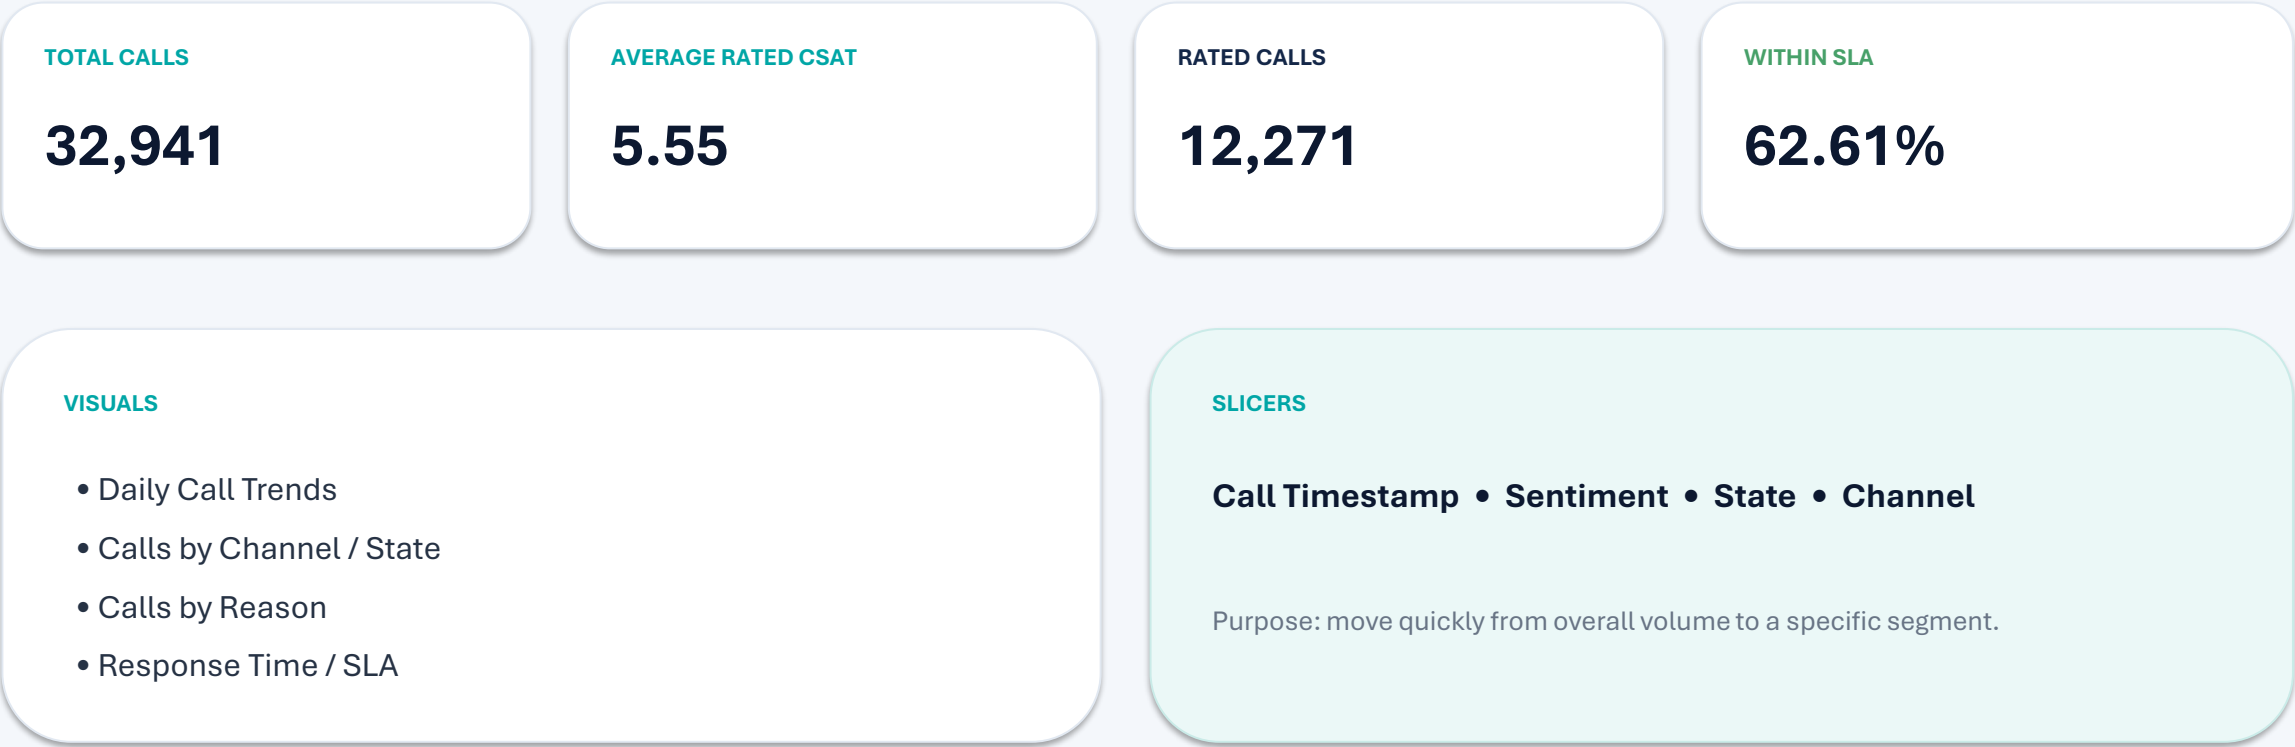

DESIGN PRINCIPLE

Move from “What happened?” to “Why?” and then to “Where should operations focus?”

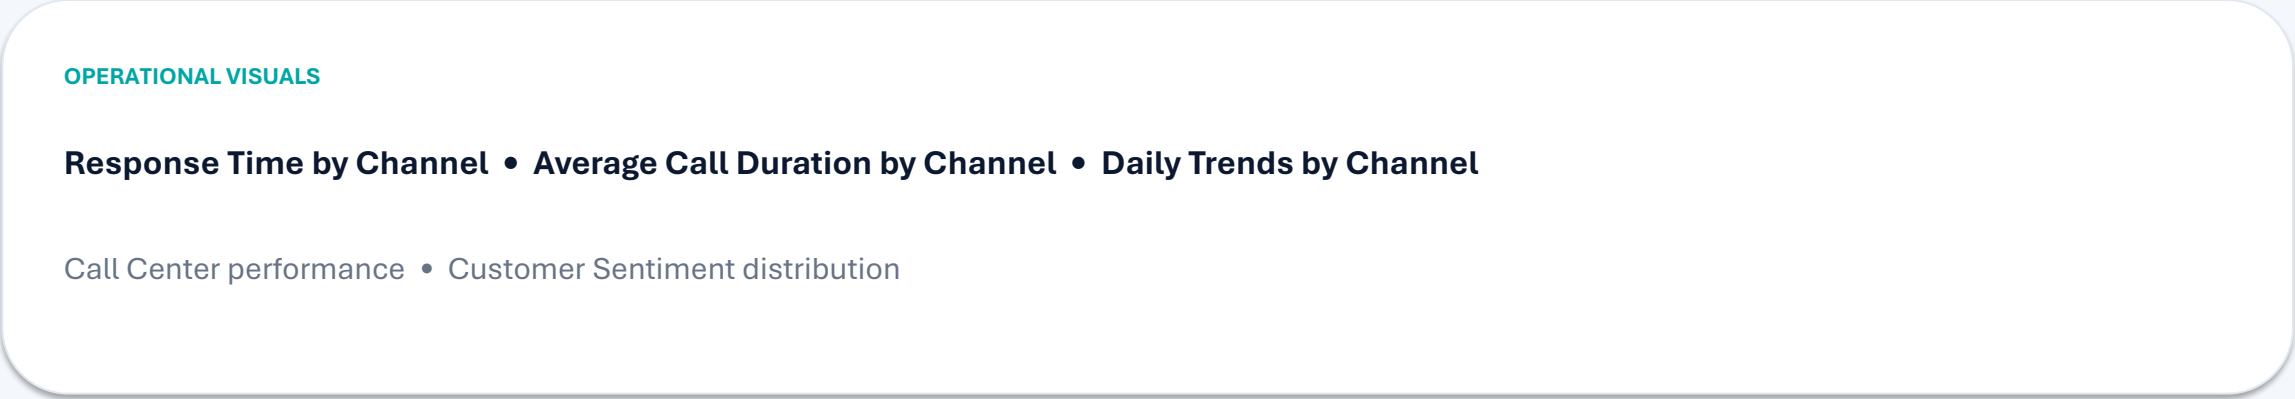

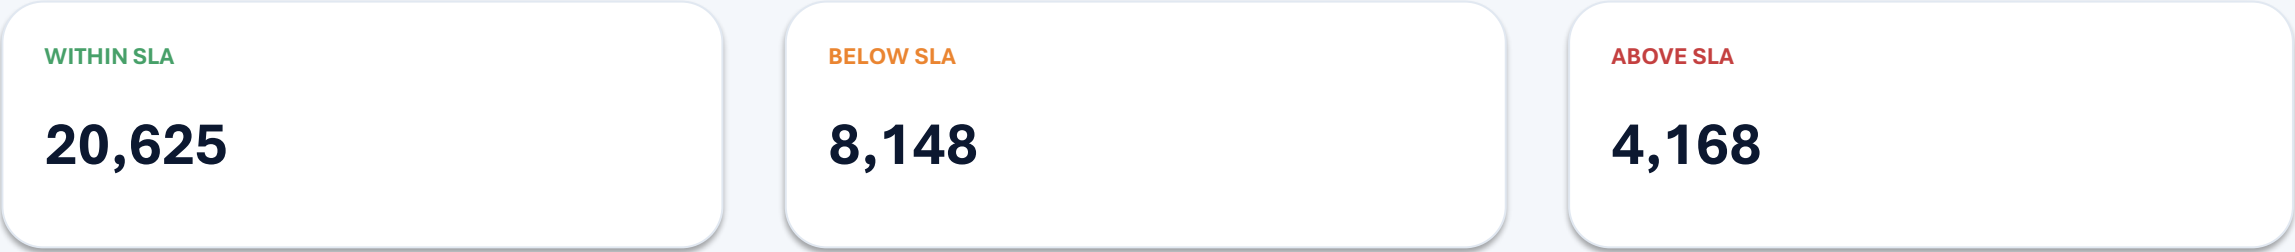

Executive Overview

A high-level view of contact volume, satisfaction, channels and service-level performance.

Call Center & Operations Analysis

Operational KPIs explain service performance behind the customer experience.

Customer Satisfaction Analysis

The satisfaction page focuses on rated calls and the factors associated with CSAT.

AVERAGE RATED CSAT

5.55

RATED CALLS

12,271

CSAT RATING RATE

37.25%

CSAT VISUALS

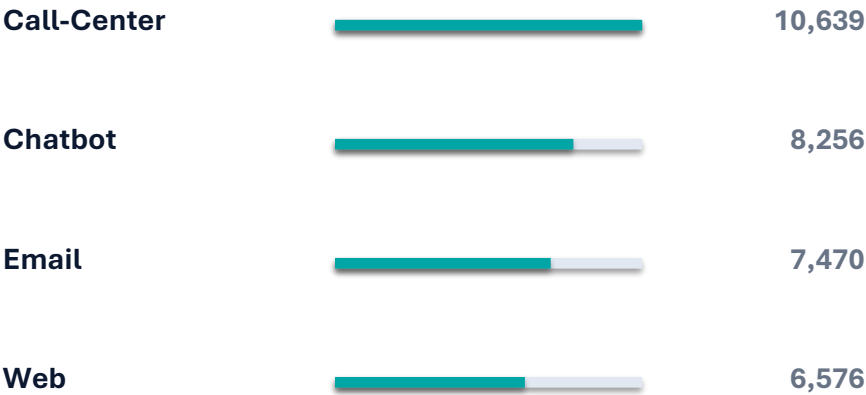

Average CSAT by Sentiment • Channel • Reason • Response Time

Rating Coverage helps distinguish satisfaction results from the large Not Rated population.

Channel & sentiment mix

Understanding contact channels and customer sentiment adds context to CSAT.

CALLS BY CHANNEL

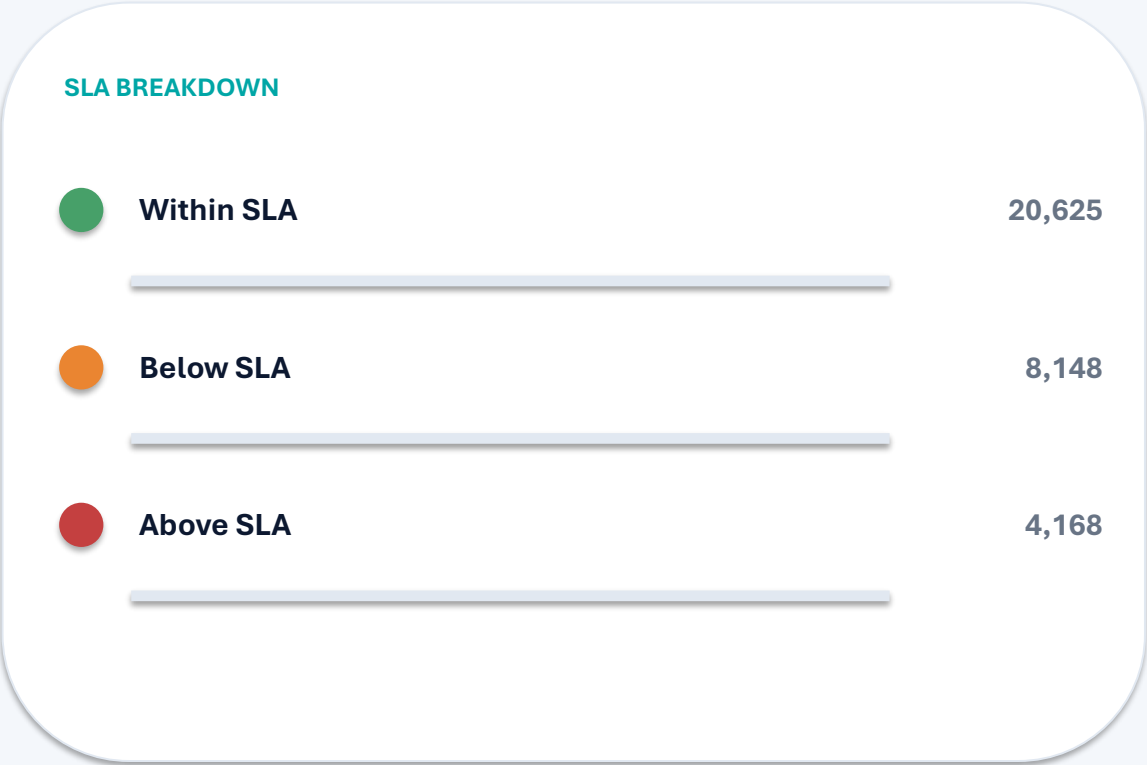

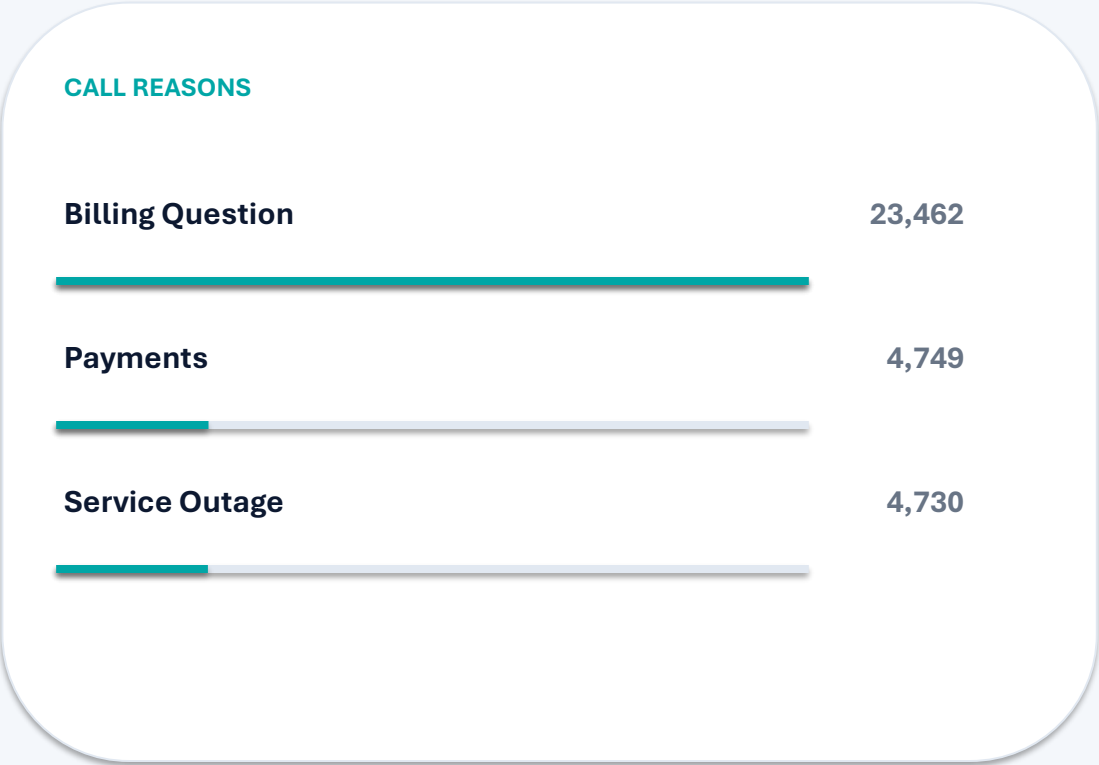

SENTIMENT DISTRIBUTION

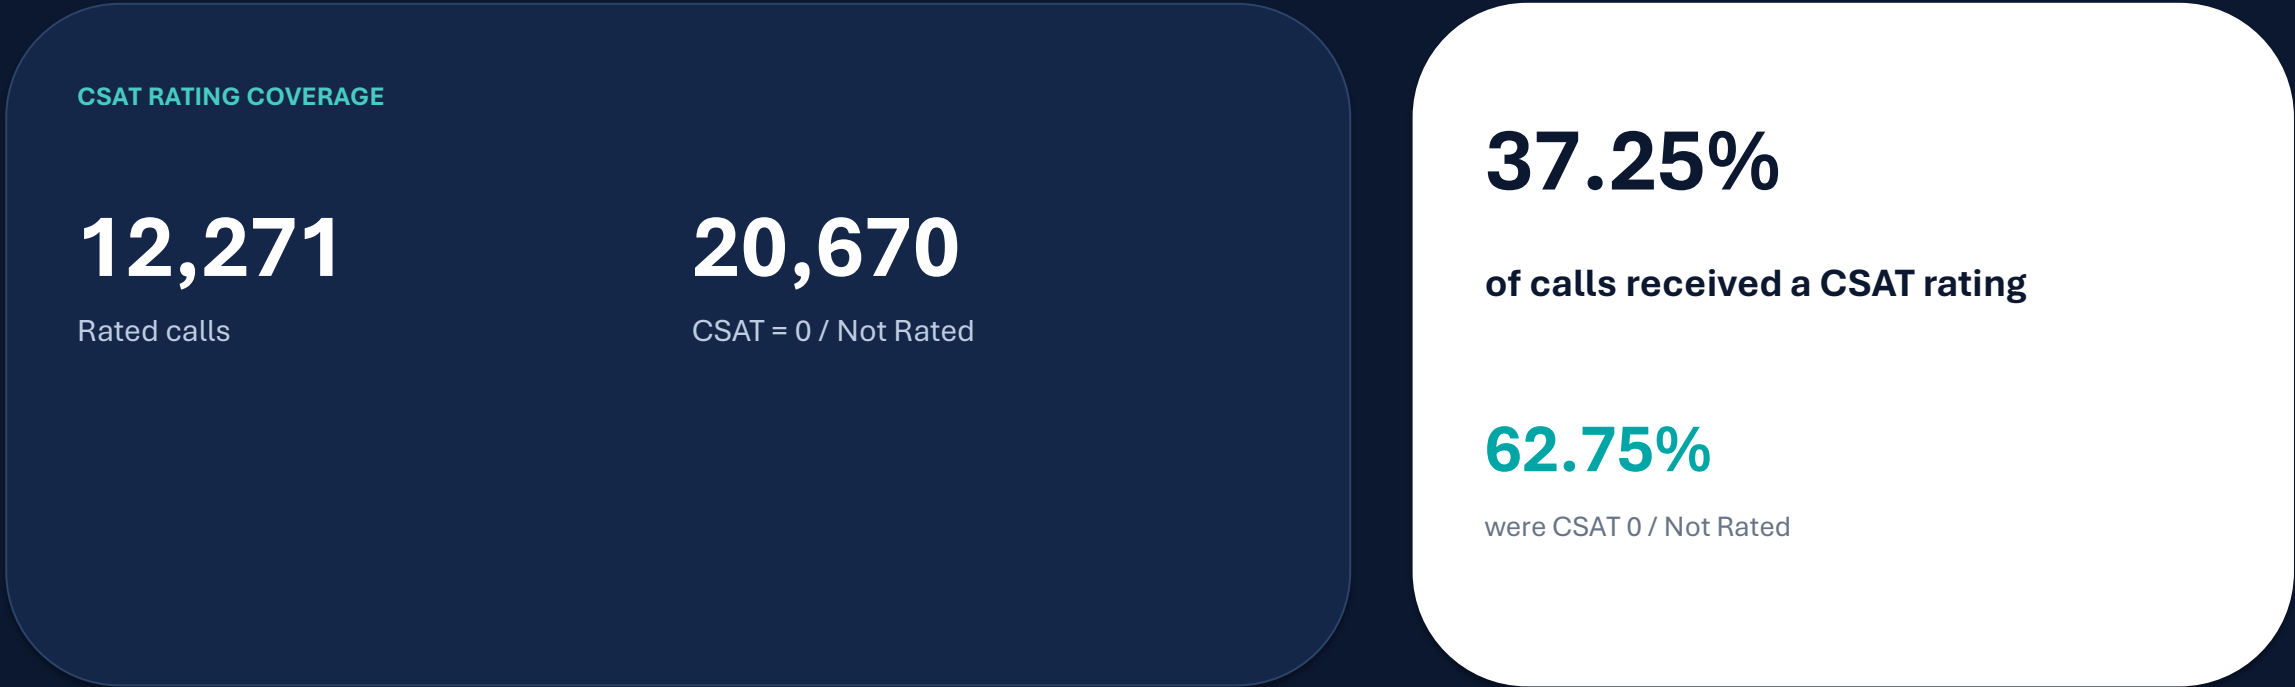

Reasons & service-level performance

These dimensions connect customer demand with operational responsiveness.

Rating coverage changes how CSAT should be read

A large share of calls has no CSAT rating.

Analytical takeaways

Use these as discussion points when presenting the dashboard.

1

Scale

32,941 calls were handled during October 2020.

2

Satisfaction

Average rated CSAT was 5.55 across 12,271 rated calls.

3

Coverage

Only 37.25% of calls were rated, so CSAT is not a complete view of all contacts.

4

Operations

20,625 calls were within SLA; performance can be analyzed by channel, center and response time.

What an analyst would investigate next

Investigation directions—not claimed root causes.

01

Increase rating coverage

Explore why most calls are not rated and whether rating behavior differs by channel.

02

Reduce SLA misses

Drill into Above/Below SLA segments by channel, call center and response time.

03

Prioritize demand drivers

Billing Questions dominate call volume; investigate recurring issues and resolution patterns.

04

Segment satisfaction

Compare CSAT across sentiment, reason, channel and response-time groups.

Skills demonstrated in the project

A concise interview story for a Junior Data Analyst role.
